

At Source Fluid Power, We take pride in innovation and creative solutions to meet customer needs. We'll be happy to develop a package to fit your design needs. Based on your suggestions, we now offer the following as standard accessories to our full product line.

Position indicator (gauge):

SFP25416 – An analog gauge used to indicate relative position of the Motorized Flow Control (MFC). This provides a visual indication of valve position with a standard toggle switch.

- It is necessary to use the "R" motor with this unit.

Double Pole –Double Throw Toggle Switch:

44269 – Is a DPDT toggle switch, suitable for controlling any Motorized Flow Control (MFC) or Motorized Pressure Control (MPC) – momentary contact, center off.

Extension Cable:

Extension cables are available with shroud and tower connectors, and are made to any length required. Cables are housed in an abrasion resistant covering. The part number for a 5 wire cable would be SFP25657C__ (List the cable length in inches.) Contact factory for details and pricing.

Example: SFP25657C**180** (Length 180 inches)

Seal Kits:

Replacement seal kits for the wet end (nose portion) of the Motorized Flow Control valves:

SFP25247 - Seal kit for the Motorized Flow Control in the - F10size.

SFP25148 - Seal kit for the Motorized Pressure Control in the - P10/PP10 size

SFP25674 - Seal kit for the Motorized Flow Control in the - F13A size.

SFP25249 - Seal kit for the Motorized Flow Control in the - F16 size.

SFP25675 - Seal kit for the Motorized Flow Control in the - F16A size.

SFP25662 - Seal kit for the Motorized Flow Control in the - FPC16 size

SFP25673 - Seal kit for the Motorized Flow Control in the - F20 size.

Special seals / material:

- Optional viton or ethylene propylene rubber (EPR) seals are available on special order.
- Stainless steel valves suitable for use with water or other fluids are also available on special order.
